Correspondence on the Health Survey of India to be conducted by the International Health Board of the Rockefeller Foundation, U.S.A.

NOTES OF DR. KENDRICK'S INTERVIEW WITH THE DEWAN.

****

7th June 1926.

a) Dr. Kendrick met the Dewan at 1-50 p.m on Monday the 7th June 1926. The First Member of Council, the Senior Surgeon, the Private Secretary to the Dewan, and myself were also present.

b) Dr. Kendrick described at some length the work of investigation of diseases and the method of preventing them, undertaken by the Rockefeller Foundation as also the work of organizing Public Health Service in various parts of the world. He referred to the work done in the United States in the matter of investigation of the Hook-worm disease which, as a result of their work, was completely wiped out in the course of 4 years in the South of the United States of America. So also they had carried on investigations in Yellow Fever and Malaria in the United States of America and in various diseases in different parts of the world. An incidental advantage that resulted from the investigation carried on by them was not only that the particular disease which they were investigating was brought under control but other allied diseases were also to some extent controlled as a result of the measures adopted by them. He added that if the Mysore Government requested the Foundation, they would be prepared to take up

the

the investigation of Hook-worm and Malaria in the Mysore State. It was pointed out that Hook-worm was very prevalent in the Krishnarajpet taluk where a very large number of inhabitants were suffering from it and that the Malnad was the hot-bed of Malaria and that investigation by the Board, of these two diseases would be exceedingly welcome. It was considered that a beginning may be made to investigate the Hook-worm disease in the Krishnarajpet taluk as soon as possible and that the malarial investigation might be taken up after the Monsoon season was over. Dr.Kendrick suggested that a reference may be made through him to the Board for the services of one of the Rutherford Foundation representatives to survey Hook-worm and Malaria in Mysore and report to Government as to the measures that should be adopted for their prevention This survey, he said, would be a preliminary one, [illegible] and would give valuable hints as to the measures to be adopted to combat the two diseases.

9 In reply to a question by the Dewan, Dr.Kendrick said that Government would be expected to provide suitable equipment, such as Microscopes and the like, and also an Assistant of the status of a Sub Assistant Surgeon, to the Survey Officer, and the services of a few Compounders. The Survey officer would also expect to have his travelling allowances paid by Government, and a motor car placed at his disposal, he being responsible for its running expenses. In places where suitable accommodation

accommodation is not available, tents would have to be provided by Government.

6) Dr.Kendrick mentioned also that the Foundation had a scheme of scholarships under which they would get suitable young men trained for Public Health work, if there was a chance of their being taken into the Public Health Service of the State. He said that at present they had 4 such Indian scholars, [2 from Madras, 1 from the Central Provinces, and 1 from the Punjab].

7) The Dewan made enquiries as to whether it would be cheaper if we got from the United States some of the medicines which we are now getting from Europe. Dr.Kendrick said that it should be very much cheaper to do so and promised to write to the Rockfeller Institute and ask them to put the Mysore Government in touch with some reputable firms in the United States

[8) Note.- With the letter to Dr.Kendrick, the following also have to be sent:-

1. Dr.Parthasarathy's and Dr.Subba Rao's reports on Malaria in the Malnad;
2. Mr. Matthan's report on Malnad Improvement;
3. The Malnad Improvement Committee's report;
4. The Latrine Report; and
5. The report on Ankylostomiasis.]

112 5/6 28/6

9) In accordance with the above note, a draft letter to Dr.Kendrick is submitted for approval.

10) I agree to draft. Sadhale treated as urgent 29/6/46

11) The Dewan said the draft may be disposed of as suggested 29/6 29/6

Serial No. 9

From the Sanitary Commissioner with Govt. No. C57-4 of 31st July/1st Aug 1926. States that the following officers may be deputed to the United States of America for special study of the subjects noted against each :-

1. Mr. F. R. Kerr — Rabies Control administration & Epidemiological investigations.
2. " M. J. Saminda Pelpola — Public Health analytical & Research work.
3. " S. Kanagaratnam — Treatment of infectious diseases & management of Infectious Diseases Hospitals.

~~Notes on matters of International Health Work to be discussed with~~

27/8/26 for orders with refce to para 2 above. Dr. Kendrick will have to be consulted in regard to the preliminary selection of candidates. (vide last para of his letter of 12.7.1926) As the period of fellowship is likely to extend up to 1 year (rule 34) arrangements will have to be made for the conduct of work during the deputation of all or any of these officers.

PUB. T

JMS 28/ It is not likely that we can 3/8/26 get three fellowships at a time.

NOTE—Contn. Sheet

Submitted to His Highness.

116

I beg to submit, for the gracious perusal of His Highness, the following note on the survey of malaria and hook-worm disease in Mysore and the training of four Mysore medical men in Advanced Public Health Work in America.

2. Having heard that the Rockefeller Foundation of the International Health Board of New York undertook, as part of their programme, to send out qualified representatives to various parts of the world for undertaking a survey of health conditions and having learnt also of the valuable results of the work done by these representatives in North and South America, China, Ceylon and parts of India, opportunity was taken by the Dewan ~~decided to~~ to invite Dr. Kendrick, the representative of the Health Board working in Madras, to meet him and me at Bangalore in ~~June~~ July last. Dr. Kendrick was given a general idea of the havoc caused in parts of the State by hook-worm disease and malaria. He was told about the investigation and remedial measures undertaken by the Mysore Government from time to time; and he was asked whether it would be possible for the Mysore Government to secure the services of a representative of the Foundation to undertake a survey of these two diseases in the Mysore State and submit proposals for their eradication. Dr. Kendrick was good enough to suggest that if we wrote to the Health Board through him, the Health Board would probably comply with our request. A letter was accordingly addressed to the Board, and from a reply which has been received ~~the~~ a few days ago ~~yesterday~~, it will be noticed that the Health Board is disposed to arrange for a survey of the kind we desire.

J & B
K

3. Dr. Kendrick wanted to meet the officers of Government again

on the 15th instant; the Dewan desired that I should meet him as he would be away. Dr. Kendrick accordingly met me for arranging details about the survey. Dr. Usmon, Dr. M.SrinivasaRao, Dr. Parthasarathy, the Chief Secretary to Government, and Mr. R. Ranga Rao were also present by request at the meeting. Dr. Kendrick said that either he would be asked to undertake this work in addition to his work in Madras or another qualified representative would be shortly sent out from America. The work is likely to be taken up in the month of January 1927. Dr. Kendrick could not just at present fix up a definite programme of work, but after hearing the opinion of Dr. Usmon and Dr. Srinivasa Rao, Dr. Kendrick thought that it would be necessary to have a preliminary examination of the area in question, to collect statistical and other figures relating to the diseases, as also all other information which the local Medical and Sanitary Officers would be able to furnish. Thereafter, a definite programme would be fixed up and the actual survey undertaken. The survey will, in all probability, consist of a visit by the Representative to typical portions of the State in which hook-worm disease and malaria prevail. The Representative will make a stay of a few days in each place and examine the localities and the persons suffering from the diseases, and make his suggestion on the remedies to be adopted. The work is likely to occupy a period of one year. Dr. Kendrick requires the help of an Assistant Surgeon and two Sub Assistant Surgeons in connection with malaria and of three Sub Assistant Surgeons in the case of hook-worm disease, and of a clerk.

4. During his survey, the Representative will have to be provided with the means of travel by the State; and also a tent for his personal accommodation where no travellers' bungalows are available. These facilities were promised to Dr. Kendrick by the Dewan during the interview he had with him in June last.

5. The exact details relating to the survey will be known later

and will be submitted in due course.

6. In connection with this survey, Dr. Kendrick has given a list of the scientific instruments and equipment which will be needed. The total cost of these comes to about Rs.6,500/- and it is proposed to authorise him to get these things from America. The amount is small and will be provided out of the Malnad Improvement Fund and certain grants made in the Education Budget for the purchase of a cinematographic apparatus.

7. Another matter in which the Rockefeller Foundation is keenly interested is the training of local men in Public Health Work under a scheme of scholarships which they give to suitably qualified candidates. Dr. Kendrick had been asked by the Dewan at the meeting in June already referred to, whether it would be possible for him to train up some of our men and grant scholarships to them. He had stated that it would be possible to secure about three scholarships for Mysore, provided the Mysore Government granted one scholarship and this principle was generally agreed to by the Dewan. On the occasion of his visit to Bangalore he examined the marginally noted six students who had been selected with the Dewan's approval as being suitable for undergoing Public Health training in America, and he has selected the following three students for the grant of scholarships by the International Health Board:-

Page 3 of Office Notes

Paras 20 & 21 of do

* 1. Mr. A.B. Renu, M.B.B.S.
2. " C.V. Natarajan, B.Sc., M.B.B.S *
3. " M. Ramachandra Rao, M.B.B.S.
4. " M. Tirumalaswami Naidu, L.M & S.
5. " T. Chandrasekharaiya, M.B.B.S.
6. " B. Ananthaswami Rao, B.Sc., M.B.B.S.

1. Mr. C.V. Natarajan, B.Sc., M.B.B.S.,
2. " T. Chandrasekharaiya, B.A., M.B.B.S. and
3. " B. Ananthaswami Rao, B.Sc., M.B.B.S.

He is sending up a recommendation to the Board in favour of these three men.

8. Dr. Kendrick also said that the student to be sent with a scholarship out of State Funds might be Mr. M. Ramachandra Rao,

In the case of the first three men referred to above, the Board gives, in addition to passage from here to America and back, an allowance of $120 in the case of single persons and $182 in the case or married persons. It is proposed that the fourth person, viz., Mr. M. Ramachandra Rao, will also get a similar scholarship out of State Funds. As this is now the middle of the term, Dr. Kendrick proposed that these people may be sent to America at the beginning of May next, their services in the meanwhile being utilised in connection with the malaria and hook-worm survey which will be undertaken with effect from next January. Of the four men that will be sent as above, it is proposed to train the first man, Mr. C.V. Natarajan, who is a highly qualified Science and Medical Graduate. in Public Laboratory work and the other three men in General Public Health Work in the districts.

9. As His Highness is aware, the need for developing Public Health Work in the districts is very great, and it is separately under consideration to revive the Public Health Department, practically in all its entirety, with effect from the next year. The men that will be trained in Public Health Work under the Rockefeller Foundation will. when they return duly qualified from America, find a place in the Public Health Department. It is understood that a year's training in America will entitle them to a Diploma in Public Health, and if they give promise of good work, the Board is likely to continue their scholarship for six months more in order to enable them to qualify themselves for the Degree of Doctor of Public Health. The men selected are all very good and it is likely that they will all be able to obtain the Degree of Doctor and thus make good and efficient officers in our Public Health Department.

10. I beg that His Highness may be graciously pleased to approve

of the survey of our health conditions under the terms referred to in paras 3 and 4 above, the purchase of the necessary equipment at a cost of Rs.6,500/- and of the deputation at the cost of the Health Board, of Messrs. Natarajan, Chandrasekharaiya and Ananthaswami Rao to America, and of Mr. M. Ramachandra Rao at Government expense, for one year in the first instance.

11. The proposals, as stated above, are in consonance with the Dewan's wishes and are agreed to by the Second Member of Council.

Page 23 of Office Notes

12. Dr. Kendrick has since written from Madras stating that the equipment necessary for the survey will cost about 193 dollars more than his original estimate, and that everywhere in the World except in Madras the officers of the Institute who draw pay from the Institute are exempt from local Income-tax. The additional cost of 193 dollars and exemption from Income-tax of the officer proposed to be employed by the Institute in our State on this purely humanitarian work may also graciously be sanctioned.

K. Chandy

G 252/Enclosures.
9/7-7-26.

Sir,

With reference to your conversation with the Dewan on the 7th ~~instant~~ ultimo, I am directed to state that Malaria prevails very largely in the malnad of the State and has reduced the vitality of the ~~popu-~~ people ~~lation~~ of the area considerably during ~~the~~ recent ~~past few~~ years. Government are extremely anxious to lessen the ravages of, if not totally eradicate the disease, and during the past several years they have taken ~~up~~ various measures with this object. They have also made several investigations on ~~the subject~~, the results of some of which are contained in the marginally* noted reports which are herewith sent for your kind reference. They would ~~greatly appreciate~~ be glad if, as suggested by you, the Rockfeller Foundation would kindly send one of their representatives to undertake a survey of Malaria in the Malnad, examine the conditions obtaining there, and advise Government on the preventive measures to be adopted in the Malnad. The representative selected by the Board may also be requested to undertake a survey of the Hook-worm disease obtaining in one or two tracts of the Mysore State.

As suggested by you, Government will be prepared to give the Survey Officer the

(enclosures, as per Note at the end of the Notes of Interview.)

1. Dr. Subba Rao's report on Malaria in the Malnad.
2. Mr. Matthan's report on Malnad Improvement.
3. The Malnad Improvement Committee's report.
4. The Latrine Report.

the necessary scientific and other equipment and the services of a Sub Assistant Surgeon and Compounders. They will also bear his travelling allowances and provide him with a motor car. Where suitable accommodation is not available, they will be prepared to supply a tent for his use.

I am to request you to kindly address the Rockfeller Foundation in the matter and secure the services of a suitable representative to undertake the work.

It is understood also that the Board gives scholarships for training young men in Public Health matters, if such young men are likely to be absorbed in the State service. The State is training quite a number of competent young men in this line of public service, and if the Foundation can help us to train a few more, the Government will be obliged to the Foundation.

81 Mount Road, Madras,

July 12, 1926.

Sir,

I am in receipt of your letter No. G 252/Sany. 1-26-1, dated 7th July 1926, in which you request that the International Health Board of the Rockefeller Foundation be requested to send one of their representatives to undertake a Malaria survey in the Malnad, advise Government on the preventive measures to be adopted there, and to undertake a hookworm survey in one or two tracts of the Mysore State.

To my knowledge the Board has never undertaken a survey of limited areas of any state or country and I am in doubt as to whether your invitation, as it stands, would receive favourable consideration. The demand on the Board for the services of trained men is so great as to make it problematical as to whether they would consider it justifiable to undertake the type of surveys that you suggest.

When I was in Bangalore I got the impression that what was wanted was a survey of the general health conditions in Mysore, with special Malaria and Hookworm surveys, with the view to suggesting to the Government of His Highness an effective reorganization of the Health Service.

Your letter under reference would seem to indicate that either there

there

(4)

has been some misunderstanding or that those present at the meeting at the Dewan's office on the afternoon of 7th June have decided to materially limit the scope of the proposed survey.

I am quite prepared to forward your request in its present form if in view of what I have already said you do not see fit to make any changes. If, however, it is decided that it is desirable to have the Board co-operate along the lines which I have indicated I shall be glad if you will address your letter to the International Health Board and forward it through me so that, if possible, it will reach New York in time for the annual meeting on 1st September.

I enclose herewith memorandum No.7664 which gives certain information concerning fellowships granted by the International Health Board. As preliminary selection of candidates is made by me in conference with official health authorities I shall be glad to discuss the matter whenever desirable.

I have the honour to be,

Sir,

Your most obedient servant,

J. F. Kendrick

J. F. Kendrick.

R. Ranga Rao, Esq., B. A., B. L.,

Secretary to the Government of His Highness the Maharaja of Mysore,

Bangalore.

San 1-26-4 (5)

To

Dr. J.F. Kendrick,
81 Mount Road, Madras.

G.4473/5.7.26.

Sir,

I am directed to acknowledge the receipt of your letter dated the 12th July 1926 on the subject of your requesting the Rockefeller Foundation to depute one or their representatives to Mysore. In reply, I am to state that what the Government desire is a survey of the general health conditions in Mysore with special reference to Malaria and Hookworm disease with a view to suggesting to Government an effective organisation of their Health Service. The details contained in my letter No G. 252 San 1-26-1 dated 7th July 1926, were given with a view to give you an idea of the nature of the work done in the past and not to define the scope of the survey to be undertaken by the Rockefeller Foundation Representative. The places to be visited, the time to be spent at each place, the inquiries to be made, the experiments to be conducted and ~~the like~~ all other matters will be left entirely to the discretion of the representative selected and Government will render all possible assistance to him in completing his work.

As required by you, I am herewith enclosing a letter to the International

6

Health Board. This, I hope, will serve the purpose. If any changes are required, they may be kindly indicated.

As regards the selection of a candidate for one of the fellowships granted by the Board, I am to say that a separate reference will be shortly made to you in the matter.

I have the honour to be,
Sir,
Your most obedient servant,

RR

(U.S.A.)

G 4489/15.7.26

(Through Dr. J.F. Kendrick,)
(81 Mount Road, Madras.)

Gentlemen

The Government of His Highness the Maharaja of Mysore have heard of the valuable work done by your Foundation in the matter of a general survey of health conditions in various parts of the world and they would be thankful if you could see your way to sending out a representative to Mysore to undertake a similar survey of the health conditions obtaining in the State with special reference to Malaria and Hookworm disease and suggest to Government an effective organisation of their Health Service. The details of the survey such as the places to be visited, the length of stay at each place, the enquiries to be made, the experiments to be conducted and the like, will be left entirely to the discretion of the representative selected by you, and Government will render him every assistance in completing his work.

As suggested by Dr. Kendrick, Government would be prepared to give the Survey Officer the necessary scientific and other equipment and the services of Medical and Sanitary Assistants. They will be prepared

to provide him with a motor car for his use. Where suitable lodging accommodation is not available, they will supply him with a tent.

The period from October to June would be the most suitable period for work in the Mysore State, and I am, therefore, to request that arrangements may be kindly made so as to permit of the representative selected by you arriving at Bangalore by about the beginning of October 1926.

In conclusion, I am to say that His Highness' Government are ~~keenly~~ alive to the desirability of having a suitable and efficient organization of Health Service in the State and would be grateful if your Board can give them the necessary assistance and advice.

Yours faithfully,

RR

Sir,

In acknowledging receipt of your letter No.G. 570/ Sany: 1-26-6 dated the 17th July 1926 asking me to submit proposals for the selection and deputation of a suitable candidate for training by the International Health Boards of the Rockfeller Foundation, I have the honor to observe that in the enclosure received (which is herewith returned for reference and kind re-transmission) the purpose of granting Fellowships is stated in general terms to be to meet definite needs in public health services. The exact scope of the training, that is to say whether it will be of the nature of a D.P.H. course or whether the training is designed for specialisation in any particular subject or in research work, has not been mentioned. I request that further particulars may, if available, be kindly furnished to me to enable me to submit the proposals called for.

I have the honor to be,

Sir,

Your most obedient servant,

B Mahomed Usmon

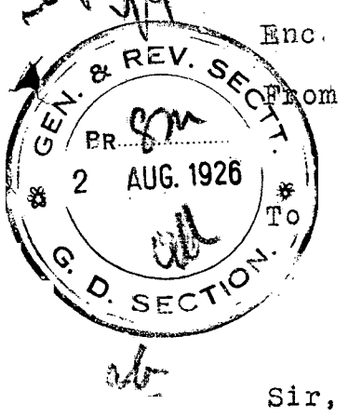
Sany Genl 1-26-9



From

Dr. R. Mahomed Usmon, L.M. S.,
Sanitary Commissioner in Mysore, Bangalore.

To

The Secretary to the Government of
His Highness the Maharaja of Mysore,
Medical and Agricultural Departments,
Bangalore.

Sir,

With reference to your letter No. G. 743 Sany. 1-26-7, dated the 24th July 1926, I have the honour to recommend the deputation of the following officers to the United States of America for the special study of the subjects noted against each:

1. Mr. J. V. Karve, Health Officer, Kolar Gold Fields.	Public Health administration & Epidemiological investigations.
2. Mr. M. G. Sreenivasa Paidpett, Health Officer, Mysore City.	Public Health, analytical and Research Work.
3. Mr. S. Varadiengar, Superintendent, Epidemic Diseases Hospital, Bangalore.	Treatment of infectious diseases and management of Infectious diseases Hospitals.

2. The above list only indicates the subjects to the study of which each officer should devote particular attention under the fellowship.

I have the honour to be,

Sir,

Your most obedient servant,

Sanitary Commissioner.

INFORMATION CONCERNING FELLOWSHIPS AWARDED
by the
INTERNATIONAL HEALTH BOARD
of
THE ROCKEFELLER FOUNDATION

Fellowships granted by the International Health Board are designed to meet definite needs in public health service. They are granted only to persons carefully selected for the work that needs to be done and with the understanding that the persons receiving them will, on the completion of their training, be appointed to important positions in the official health services of their own country or in schools of hygiene.

A. REQUIREMENTS FOR APPOINTMENT TO FELLOWSHIP

1. In the selection of fellows high professional and scientific qualifications, as well as dependability and qualities of leadership, are sought.

2. Preference is given to applicants under thirty-five years of age.

3. Assurance should be given that the candidate will receive, and accept, an appropriate appointment upon the completion of his fellowship.

4. All fellowships are granted by action of the Executive Committee of the Board.

B. APPLICATION FOR FELLOWSHIP. The preliminary selection of candidates is made as a rule by the local representative of the Board in conference with the official health authorities. Applications, with supporting papers, are forwarded to the New York Office for final action. These should include:

5. A <u>complete</u> personal history record, on forms provided.

6. A report of a medical examination by a reliable physician, on blank furnished.

7. A statement of special and graduate courses in medicine, science, and public health taken by applicant; a list of his publications on medical and scientific subjects; a statement of his practical experience since receiving the doctorate.

8. A statement of subjects applicant desires to study under the fellowship.

C. STIPEND. A fellowship provides for the payment of a definite sum monthly, in advance, during the period of study, the amount varying with the country in which studies are being pursued. The usual rate in the United States is $120 a month for a single and $182 for a married Fellow. (A Fellow will not be entitled to the higher rate unless he was married at the time his application was made.) During a period of residence in a hospital or other institution in the United States, which provides living accommodations, the stipend is $40 a month for a single and $100 a month for a married Fellow.

Stipend payments are for the period of actual study and do not cover the time required for travel from home to place of study and return, except that in the case of a married Fellow the additional stipend to which he is entitled will be allowed during the period of travel, both to and from his place of study.

D. TUITION. The Board pays matriculation, instruction, and other regular university fees; rental of microscopes, lockers, and apparatus, including required deposits; and the cost of unusual necessary materials, if approved in advance of their purchase by the officers of the Board. The following are paid for by the Fellow from his monthly stipend: textbooks, instruments, laboratory garments, incidental supplies, laboratory breakage, etc.

E. TRAVELING EXPENSES. A fellowship provides for the necessary expenses of travel from the home or previous station of the recipient to his place of study, and return. This allowance does not, however, include the cost of travel for the wife or family of a married appointee. The following are considered legitimate items of travel expenses:

9. Railroad and steamship fare, including berth, for travel by shortest practicable route.

10. Cost of passports, visés, and other official or governmental charges (except customs duties).

11. Meals en route and hotel expense in case a stop-over is necessary while en route.

(17)

12. Cost of transferring and checking necessary baggage.

13. Taxicab in case of necessity. Street cars should be used whenever available.

14. Tips to a reasonable amount and commensurate with existing customs.

15. It is not necessary to cable home on arrival in the United States. The New York Office of the Board cables a notice of arrival to its representative and he promptly notifies the families concerned.

16. Any balance of the advance payments made to the Fellow in foreign money before he leaves his own country should not be changed into dollars on board the steamer, but should be kept in the foreign money and handed in at the New York Office, together with a detailed account of traveling expenses. However, each Fellow on arriving in the United States should have at least $10 in U. S. currency to supply his immediate needs. If necessary, he should exchange enough of his foreign money to provide this amount of U. S. money, but the balance of his foreign money should not be exchanged.

Indian Rupee in silver & U.K. in Gold coin

F. GENERAL INFORMATION RELATIVE TO EXPENSES

11/3/1948

17. Following his arrival at the place of study, except as noted under item 18 in this section, a Fellow is expected to pay all his living expenses from his monthly stipend.

18. A reasonable charge for meals will be allowed during the first twenty-four hours after arrival at the place of study. Expense for hotel room may also be allowed, if necessary, for a period of three days after arrival at place of study while arrangements are being made for satisfactory lodgings. Such hotel expense, when included in the expense account, should be accompanied by hotel receipt.

19. Items of personal expense, such as repair of clothing, barber's fees, refreshments, entertainment of self or friends, books, and donations to charities, should not be charged to expense account.

20. Expenses should be recorded in the monthly expense book furnished by the Board. The two summary sheets on the inside of the back cover should be filled out and one copy retained for future reference. Expenditures should be recorded in terms of the currency in which they are made, not in United States money.

21. Expenditures chargeable to the Board should be made with the same care one employs in using one's own personal funds.

G. INSTRUCTIONS FOR NEW FELLOWS

22. As soon as the applicant receives notice that a fellowship has been granted to him he shouldcommunicate with the Board's local representative who will furnish the necessary information and assistance in regard to kinds of clothing needed, transportation, baggage, passports, etc. He will also advance sufficient funds for incidental expenses en route to place of study, and will notify the New York Office of the date of the Fellow's arrival in the United States.

23. It is advisable, if there is an opportunity, to confer with individuals who have previously held fellowships from the Board.

24. Baggage should include only the necessary personal effects and clothing. Since customs duties are charged on all household goods, it is inadvisable to bring them to the United States. Microscopes, scientific instruments, and laboratory supplies are subject to high duties and should be left at home; they can be rented at the place of study. Books and heavy articles should also be omitted from baggage. Before landing an accurate declaration of baggage must be prepared for the customs. Forms are furnished on board ship for this purpose.

25. When he arrives in New York a Fellow is usually met by a representative of the Board. Before landing he should pack in one suitcase wearing apparel and toilet articles necessary for one day. This will facilitate handling of luggage on landing. At the dock he should leave all other luggage on board and with this one suitcase go directly to the section of the pier marked with the first letter of his last name. He should then stand there until the Board's representative presents himself. This is the only way in which it is possible during the confusion of landing to find a traveller.

    If he is not met at the pier by a representative of the Board, he should proceed at once to the Hotel McAlpin or Hotel Martinique. He should then call promptly at the office of the Board, 61 Broadway, where detailed arrangements for study will be discussed and completed. If he arrives in a city other than New York, he should proceed immediately to the city or institution in which he is to study; or, immediately after landing he should telegraph the New York Office and await instructions.

H. GENERAL INFORMATION

26. Fellowships do not provide traveling and other expenses of families. The high cost of living, the difficulty of securing satisfactory housing accommodations for families, in addition to the language difficulty, ordinarily make it inadvisable for men to bring their families with them.

27. <u>A speaking and reading knowledge of English is indispensable for study in the United States</u>. Fellows who do not have such knowledge should plan to arrive in the United States at least two months before their regular course of study begins. Time thus devoted to study of the English language will be included in the fellowship or stipend period.

28. Arrangements for study and work of Fellows coming to the United States are made by the Board's Fellowship Adviser, taking into consideration all the requirements of their future work. Fellows themselves should make no arrangements for study unless definitely authorized to do so by the Board's representative in his own country.

29. A Fellow should bring with him a statement, if possible verified by university authorities, of all special and graduate courses in medicine, science, and public health taken by applicant. Graduates should also bring their diplomas. Evidence of this kind may be required for admission to institutions in which the Fellow desires to study.

30. Fellows should not expect to have arrangements made for them to work in the Rockefeller Institute for Medical Research. It is a research institution only and is not prepared to do any teaching.

31. Each Fellow will find it useful to know the public health situation in his own country, and to have at hand the latest official reports and other available printed matter pertaining thereto.

32. It is the custom for officers and members of the staff of all departments of the Rockefeller Foundation to send to the New York Office for approval their scientific or other papers before they are offered for publication. Fellows are requested to follow this practice. If desired, suggestions can frequently be made that will facilitate publication.

33. Fellows should know all the requirements of the school or institution in which they may study, especially the regulations governing attendance at classes, examinations, and the conditions which must be met by candidates for advanced degrees.

34. Fellowships are awarded for periods of varying length, not exceeding one year. Extension or renewal is conditioned upon a satisfactory record and recommendations from those responsible for the original appointment.

35. The time required for travel from the Fellow's home to the place of study is not included in the period of the fellowship. Expenses are provided during such travel, however, and the monthly stipend begins upon arrival at the place of study.

36. Fellows should not expect to attend public health conferences and scientific meetings at the expense of the Board. Exception may be made, however, in case a Fellow is invited to present a report or paper dealing with an important investigation in which he has been engaged, provided the paper has been submitted to the New York Office and approved.

37. Fellows should not expect to be reimbursed for expenses incurred in connection with their publications, such as typewriting, photographs, reprints, etc., unless approval has been secured in advance from a representative of the Board.

38. Ordinary expenses for medical and dental services should be paid by a Fellow from his regular stipend. The Fellowship Adviser will frequently be able to assist him in securing such service at moderate fees. In case of serious illness which requires hospital care or unusual medical service the Board expects to co-operate in meeting the necessary expenses. Each case is decided on its merits. In case of serious illness while traveling, a Fellow should communicate at once with the New York Office or with the Board's nearest representative.

39. The Board desires to receive from each Fellow during his period of study, an annual report covering his academic work and activities. These statements are of great value to the Board in the administration of its fellowship program, as well as to the schools in which these Fellows are studying, and thus indirectly to all future Fellows. Reports may be prepared under the following headings.

(a) Personal data: Name, subjects studied, with dates and places.
(b) Environment: General experience and relationships with fellow students, teachers, and citizens of the country in which studies are pursued, noting special advantages or difficulties encountered.
(c) General: Suggestions of any kind relative to the Board's fellowship program will be appreciated.

40. The International Health Board reserves the right to withdraw a fellowship and terminate the payment of the stipend in case of conduct that is, in the opinion of the officers, prejudicial to the object which the Board is seeking to promote.

Correspondence should be addressed to the International Health Board, 61 Broadway, New York City, U.S.A.

SUBMITTED

I have read through the Prospectus of the International Health Board of the Rockefeller Foundation concerning Fellowships. I had hoped to find therein some clue indicative of the Subjects one could select for Special Study. I presume such has been deliberately omitted in order to afford the student a wide field of choice. On this presumption I beg leave to submit the following.

In our progressive State sufficient attention has not been paid to research work, in the Field of Medicine and Hygiene. While from other parts of India, almost every other week, one reads of something new, something striking, something useful being published as a result of patient labours of research workers, we in Mysore contribute next to nothing. This is so not because there is no available material but because there are no workers. In order therefore, to keep abreast of the times, it is very desirable that men are trained to be able to undertake research work. Such men in addition, would be very useful in teaching work in the Medical College of our University.

Again at present the Mysore Government is spending large sums of money in purchasing Sera and Vaccines from outside. There is no reason why it should not be possible to make some of them in our Laboratories. There would then be so much saving of time and money.

It would be therefore of immense advantage to the State to send out some of its experienced Officers with requisite qualifications, to America, to study any of the following subjects. As to the exact places of study in America, the selection is best left to the Local Representative.

1. Tropical Medicine & Hygiene particularly Entomology Protozoology, Helminthology and Pathology.
2. Making of Sera and Vaccines, and methods of Serological Diagnosis.

3. Study of Tubercle, Leprosy and Syphilis.

I am prepared to take up No.1. I am proceeding to London almost immediately on 8 months leave. The first item in my Programme will be to study in the London School of Tropical Medicine and Hygiene. If facilities for study in America under The Rockefeller Foundation in Tropical Diseases are afforded to me, I shall be only too glad to take the full benefit of these.

Medical Officer of Health,
Kolar Gold Fields.

Out of the four candidates to be selected, two may b e Brahmins and the other two non-brahmins. Among Brahmins, Mr. C.V. Natarajan has already been recommended by me for entertainment in the Public Health Institute. He is besides a double graduate who has taken a First Class both in - Chemistry as well as in Medicine, so that - I take it - the question of his deputation to Amercia is practically settled. The choice of the other Brahmin candidate lies between Messrs; B. Ananthaswami Rao and M. Rangaswami. The two non-brahmins are Messrs: M. Ramachandra Rao and M. Tirumalaswami Naidu. The former belongs to the Bhavasara Kshattriya community - being the first Medical Graduate in that Community. He is also an Arts Graduate.

Yours sincerely,

M Ahmed

To

R. Ranga Rao, Esq., B.A.,B.L.,
General Secretary to Government,
Camp, M y s o r e.

Dear Sir,

In continuation of my D.O. letter No.C. 57-A, dated Camp Mysore, 21st October 1926, I herein enclose an application from Mr. Chandrasekharayya another Medical Graduate who has just reported himself to me. He is a B.A., M.B.B.S., and belongs to the Telugu Banajiga community. His age is 26 years. I would recommend him, in preference to Mr. M. Thirumala swami Naidu, for selection to be sent to America to study under the Rock-Feller Foundation

Yours sincerely,

To

R. Ranga Rao, Esq., B.A., B.L.,

OFFICE OF THE SANITARY COMMISSIONER
WITH THE GOVERNMENT OF MYSORE,

Bangalore, dated....14th November 1926.

Sn 1—26-24

From B. Mahomed Usmon, Esq., L.M.&.S.,
Sanitary Commissioner with the Government of Mysore, BANGALORE.

To R. Ranga Rao, Esq., B.A., B.L.,
General Secretary to Government of
H.H. the Maharaja of Mysore,
Bangalore.

SIR,

With reference to your letter No. G. 3131/Sany: 1-26-14 dated the 18th September 1926, I have the honor to forward herewith a note embodying the statistics of Malaria cases treated in various hospitals in the City of Bangalore together with copies of notes kindly furnished by the Health Officer, Civil & Military Station regarding the incidence of Malaria in the Station during the last three years.

I have the honor to be,

Sir,

Your most obedient servant.

S. Srinivasa Rao.
For Sanitary Commissioner.

Enclosure No.

(63

Note on the incidence of Malaria in the Bangalore City during each of the three years ending 1925.

The Statement annexed shows the number of Malari cases treated in the various Hospitals and Dispensari in the Bangalore City during the last three years. They amounted to 35,155 in 1923, 31,934 in 1924 and 27,228 in 1925 equivalent to 288.08, 269.35 and 229.6 per 1,000 of population respectively. Statement III attached shows corresponding figures for the Malnad Districts for purposes of comparison. Although these figures cannot be taken to indicate absolutely the extent of prevalence of malarial fevers they are useful for purposes of comparison.

2. In statement III comparative figures of death-rates under 'Fevers' during the past three years are noted for the City of Bangalore and each of the Malnad Districts.

S. Sreenathan

C & M Station.

INCIDENCE OF MALARIAL FEVER

1923-1924.

(47)

108 deaths were registered under this.

The following figures supplied very kindly by the Medical Officers of the local Civil and Military Hospitals and Dispensaries are put up:-

1. Civil Hospitals and Dispensaries.

		In-Patients	Out-patients.
(1)	Bowring Hospital	223	1311
(2)	Lady Curzon Hospital	153	861
(3)	C.E.Z.M. Hospital	59	57
(4)	Saadut Dispensary	..	1764
(5)	Ulsoor Dispensary	..	3774
(6)	Fraser Town Dispensary	..	4466

11. Military Hospitals.

(1)	British Station Hospital	127	..
(2)	Indian Station Hospital	571	..
(3)	Followers and Staff Hospital	495	..
	Total	1,628	12,233
	Grand Total		13,861

Note:

(1) Hospital figures (in-patients) have been confirmed by microscopical examination.

(2) Dispensary Figures (out-patients) are based on empirical diagnosis.

(3) Figures from Private Medical Practitioners are not available.

Health Officer,

'C O P Y'

Amritaraj

For Sanitary Commissioner.

C.&. M. STATION. INCIDENCE OF MALARIAL FEVER 48

1924-1925.

The total number of deaths under this head was 47 as against 108 for last year (1923-24). The accuracy of these figures cannot be relied on as they are based to a considerable extent on subsequent inquiries, there being no opportunity for actual medical diagnosis before death in scarce in Bangalore. In the village of Nilsundra owing to the marshy condition of the Koramangal Tank an epidemic of mild Benign Tertium Malaria broke out. Itinerating dispensing of quinine was resorted to. 345 cases were so treated.

The following statements giving particulars of fevers classified under Malaria have been very kindly furnished by the various medical officers of the Civil and Military Hospitals. The in-patient figures are based on microscopic diagnosis only while those of out-patients are by empirical diagnosis only. Figures from Private Medical Practitioners are not available.

1. CIVIL HOSPITALS AND DISPENSARIES.

		in-patients	out-patients.
(1)	Bowring Civil Hospital	185	825
(2)	Lady Curzon Hospital	..	795
(3)	C.E.Z.M. Hospital	52	37
(4)	Fraser Town Dispensary	..	4784
(5)	Ulsoor Dispensary	..	2229
(6)	Saadut Dispensary	..	1297
	11. MILITARY HISPITALS		
(1)	British Station Hospital	62	..
(2)	Indian Station Hospital	294	..
(3)	Followers & Staff Hospital	125	..
	Total	718	9967
	Grand Total		10,685.

The incidence is much less than in previous years and is no doubt due to our Antimalarial Schemes and measures.

GEN. & REV. SECTT. BR. Gm 19. NOV. 1926 G. D. SECTION.

To The General Secretary to the Government of His Highness
the Maharaja of Mysore,

BANGALORE.

No. 1563/26, *dated* 17th November, 1926.

Sir,

Enclosures

Spare Copies

Referring to our meeting in the office of the First member on 15th November, I have the honour to enclose herewith for Government endorsement requisitions for supplies which I think will be necessary for conducting Malaria and Ankylostomiasis surveyes in Mysore.

2 I have estimated that the approximate cost of these supplies to the Government of Mysore will be Rs.6,600.

3 If you will kindly countersign these requisitions and return them to me at your earliest convenience I shall forward them to the International Health Board's purchasing officer who will make the purchases and ship the supplies with as little delay as possible. The services of the purchasing officer will entail no extra cost to the Government of Mysore.

4 Supplies intended for the Government of Madras have always been consigned to me through the Agent for Government Consignments. I am wondering how such consignments intended for your Government should be marked and whether they should be imported into Madras or elsewhere. If your Government has no clearing agent in Madras I might arrange to have the cases cleared and transhipped to Bangalore for you if you would care to have me do it.

S.P.C.'s seen to please note. 20/11

I have the honour to be,
Sir,
Your most obedient servant,

J. F. Kendrick
Director,
Ankylostomiasis Campaign,
Madras.

ENCLOSURES

SHARE COPIES

Upon my return to Madras it occurred to me that it might be well for us to include in the requisition for supplies the following articles which will be most serviceable to Government even after this survey has been completed. The approximate cost of each article is noted:

One Monroe Calculating machine - for adding, subtracting, multiplying, dividing, and taking square root, at a very rapid rate...	$ 125.00
One Corona Portable Typewriter with Standard Keyboard... ... ... Value $60.00 less 10% discount. ...	$ 54.00
12 Corona Ribbons...	$ 7.50
2000 Gem clips No:3 size...	$ .46
2000 Gem clips No:1 size...	$ .46
1 Gross Ideal paper clamps No:1 size. ...	$ 1.25
600 Ideal Paper clamps No:2 size.... ...	$ 1.23
1 Dexter Pencil sharpener...	$ 4.00

Please let me know whether it is Government's desire that these additions ~~are to~~ be made to the requisition. *

No. 2864/26, *dated* 17th November 1926.

Sir,

Reference: The conference in the office of the First Member at Bangalore on 15th November, at which the undersigned was present.

I have the honour to enumerate below the number of assistants that I think will be necessary in conducting the proposed Malaria and Ankylostomiasis surveys in Mysore.

Assistant Surgeons.	1.
Sub Assistant Surgeons.	5 or 6.
Clerks.	1 First class, perhaps with knowledge of Short-hand and Typing.
Sweepers.	2 or 3.
Peons.	1 - perhaps 2.

It is understood that Government will supply a Motor Car for the use of the officer deputed by the International Health Board.

It was suggested that the four Doctors who have been proposed for fellowships might be employed in this survey work pending the decision of the Executive Committee of the Rockefeller Foundation as to whether the fellowships are granted. I believe this is agreeable to Government.

A point which I neglected to bring up at the meeting but which I think should be brought to your attention now is whether income or profession tax is to be imposed upon the International Health Board's representative in Mysore. To my knowledge the only place where the Board's representatives have not been exempted from taxes of this nature is

To No. 9. 5847 Sus 6 / 30/11/26

Dr. J.F.Kendrick,

M A D R A S.

Sir,

With reference to your letters Nos. 1563/26 and 1565/26 dated the 17th November 1926 enclosing requisitions for the supply of apparatus necessary for conducting Malaria and Ankylostomiasis Surveys in Mysore, I am directed to return herewith, duly countersigned, your requisition for articles estimated to cost ~~Rs.~~ Rs. 6,600/-. The purchase of articles at an additional cost of $ 193,90 referred to in your -- letter dated 17.11.26 is also approved. The requisitions may be kindly forwarded to the -- International Health Board's Purchasing Officer to make the purchases and ship the supplies as early as possible.

2. Messrs. The South Indian Export Co., Madras are the Clearing Agents of the Government of Mysore, at Madras. The consignments may be addressed to the Superintendent, Government Medical Stores, Bangalore, and the shipping documents may be caused to be forwarded to the Senior -- Surgeon in Mysore, Bangalore for the issue of the necessary despatching instructions to the Clearing Agents.

With reference to your letter No. 1564/2 dated the 17th November 1926, I am directed to state as follows:-

The services of

(a) An Assistant Surgeon and two Sub Sub Assistant Surgeons for Malaria work;

(b) Three Sub Assistant Surgeons for Hook-worm work; and

(c) One Clerk;

will be placed at the disposal of the Representative deputed by the Board for conducting the Malaria and Ankylostomiasis Surveys in the State.

2. The Representative will be provided with the means of travel, including a motor car, and a tent for his personal accommodation where no Travellers' Bungalows are available.

3. Government agree to the suggestion, that the four Medical Men selected for Fellowships, may be employed in the survey work, pending the decision of the Executive Committee of the Rockefeller Foundation about their Fellowships.

4. I am to add that the Representative of the International Health Board will be exempt from local income-tax.

I have, etc.,

----oOo----

ORDER No. G. 7128-47

Bangalore, 24th December 1926.

Government have had under consideration the question of arranging for a Health Survey of the State. Having heard that the International Health Board of the Rockefeller Foundation of New York undertook as part of their programme to send out qualified representatives to various parts of the world for conducting a survey of health conditions of the localities, opportunity was taken by Government to invite Dr. J. F. Kendrick, the representative of the Health Board working in Madras, to meet the officers of Government at Bangalore in June 1926. As a result of the discussion with him, the International Health Board was requested through Dr. Kendrick to arrange for a Health Survey of the State. The Board has very kindly agreed to depute one of their representatives for this work.

2. The preliminary details for starting the survey were settled with Dr. Kendrick during his visit to Bangalore in November 1926. The survey which will be conducted with special reference to Malaria and Hookworm disease and is expected to begin in January 1927 and last about a year. Before commencing the actual survey, it would be necessary to have a preliminary examination of the areas selected to collect statistics and other data relating to the diseases and

61

other information which the local Medical and Sanitary Officers would be able to furnish. - The survey will consist of a visit by the representative to the typical portions of the - State in which Hook-worm disease and Malaria - prevail. The representative will make a stay of a few days in each place and examine the localities and the persons suffering from the - diseases and make his suggestions on the remedies to be adopted.

3. To assist him in this work, the service of one Assistant Surgeon and two Sub Assistant Surgeons for Malaria work and of three Sub Assistant Surgeons for Hook-worm work will be -- placed at the disposal of the representative. He will be given a clerk and a menial staff of three sweepers and two peons. He will also be provided with means of travel including a motor car and a tent for his personal use where no -- Travellers' Bungalows are available. The representative will, as a special case, be exempted from the payment of the local income-tax.

4. Scientific instruments and appliances at an estimated cost of Rs. 6,600 in addition to some other articles costing about Rs. 535 required for conducting the survey operations have been ordered for, through Dr. Kendrick. - The cost on account of these purchases will be met out of the sum of Rs. 6,500 available out of the Malnad Improvement Grant for the curren year and ~~certain grants made in the Education~~ budget for the purchase of a cinematographic - apparatus. (as noted in the margin)

the sum of Rs 10,000 set apart for rural instruction and this lump sum provision for Rural Uplift under economic development (Rs 4)

5. Another matter in which the Rockefelle Foundation is keenly interested is the traini

(6v

of local men in Public Health Work under a scheme of scholarships which they give to suitably qualified candidates. This question is under correspondence with the International Health Board.

6. The Senior Surgeon is requested to submit proposals about the officers to be deputed for work under the representative and also about the source from which the remainder of the cost of these arrangements is to be met.

He should also collect necessary preliminary data for the Survey. The villages or areas in which decrease in population has been most marked should be ascertained & a list kept ready.

(U.S.A.

(Through Dr. J.F. Kendrick,
81, Mount Road, Madras)

Gentlemen,

The Govt. of His Highness the Mahara[illegible] of Mysore have heard ~~from Dr. J.F.Kendrick~~ the valuable work done by your Foundation [illegible] the matter of a general survey of health c[illegible] tions in various parts of the world and t[illegible] would be thankful if you could see your w[illegible] sending out a representative to Mysore t[illegible] -take a similar survey of the health condi[illegible] obtaining in the State with special refe[illegible] to Malaria and Hookworm disease and sugg[illegible] Govt. an effective organization of their [illegible] Service. The details of the survey su[illegible] the places to be visited, the length of [illegible] at each place, the enquiries to be mad[illegible] experiments to be conducted and the li[illegible] be left entirely to the discretion of [illegible] representative selected by you and G[illegible] render him every assistance in co[illegible] work.

As suggested by Dr. Kendrick, Go[illegible] would be prepared to give the Survey C[illegible] the necessary scientific and other equ[illegible] and the services of Medical and Sanita[illegible] -ants. They will ~~also give him a cu~~ be prepared to travelling allowance and provide him motor car for his use. Where suita[illegible] accommodation is not available, they [illegible] ply him with a tent.

I am to express the hope that these facilities will be sufficient and that the Board will find it possible to comply with the request contained in this letter. The period from October to June would be the most suitable period for work in the Mysore State, and I am, therefore, to request that arrangements may be kindly made so as to permit of the representative selected by you arriving at Bangalore by about the beginning of October 1926.

Yours faithfully,

RR
13/7.

Sir Mirza led a health delegation some time back as a representative of India. 9 pressmen & Jawans Hall are the details please put,

12.3.1948.

In conclusion, I am to say that His Highness' Govt are keenly alive to the desirability of having a suitable and efficient organization of Health Service in the State and would be grateful to the Board if you would give them the necessary assistance & advice.
